

AMBAR GUPTA

AI Agent Developer | RAG & Automation Engineer | Full Stack · FastAPI · LLM Integration | B.Tech CSE (AI & DS)

itsambar14@gmail.com | +91-9098619773 | LinkedIn | GitHub | LeetCode | Portfolio

PROFESSIONAL SUMMARY

B.Tech CSE (AI & DS) student specializing in **AI agent development, RAG pipelines, and LLM-powered automation**. Currently interning as a Full Stack Developer at Site Guru Pvt. Ltd., building production applications serving real users. Hands-on experience designing end-to-end AI systems including NLP pipelines, vector-search RAG architectures, Claude and Groq LLM integrations, and multi-step agentic automation workflows with n8n and FastAPI backends. Certified in AI development by Cisco Networking Academy and Anthropic. Strong foundation in OS, DBMS, and Computer Networks with 300+ DSA problems solved. Seeking AI Agent, Automation, and RAG engineering roles.

EDUCATION

Sagar Institute of Science & Technology (SISTec GN) — B.Tech CSE (AI & DS) | CGPA: 7.6 Aug 2023 – Jun 2027

- Relevant coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Machine Learning, NLP, Software Engineering.

Saraswati Higher Secondary School — Class 12: 87% (2021 – 2023) | Class 10: 97% (2019 – 2021)

WORK EXPERIENCE

Full Stack Developer Intern @ Site Guru Pvt. Ltd. Jun 2026 – Present

Remote

- Built and enhanced **3+ full-stack web applications** using Vue.js, JavaScript, Node.js, and MySQL, delivering features used by production users.
- Engineered **API integrations and authentication modules**, and integrated Razorpay payment gateway, reducing manual payment handling by **100%** for 2 client applications.
- Architected and deployed **real-time communication features** using WebSockets and LiveKit, enabling live chat, video streaming, and meeting functionality with sub-200ms latency.

TECHNICAL PROJECTS

SISTec Bot — AI-Powered College Assistant Python · Streamlit · LLM · RAG · NLP 2025 – 2026

- Built an AI-powered college chatbot serving **500+ students** with academic queries, notices, resources, and campus information — live at [sistecbot.streamlit.app](#).
- Designed a **RAG pipeline** (institutional document ingestion → vector indexing → LLM synthesis) achieving **90%+ query relevance** across diverse student questions.
- Deployed on Streamlit Cloud; reduced average student query resolution time by **70%** compared to manual information lookup.

AI Interview Preparation Bot — Automated Hiring Workflow n8n · Groq AI · Gmail API · Google Sheets · Automation 2026

- Designed an end-to-end **agentic automation pipeline** that generates role-specific interview questions via Groq AI, delivers them to candidates via Gmail, and logs all records in Google Sheets — **0 manual steps** — live at [AI Interview Bot Records](#).
- Orchestrated with **n8n**: multi-step workflow connects 4 external APIs (Groq, Gmail, Google Sheets, webhook trigger), processing **20+ candidate records** per run with zero human intervention.
- Reduced interview preparation workflow time by **85%** versus manual question creation and email dispatch.

TECHNICAL SKILLS

AI Agents & RAG: LangChain, LangGraph, CrewAI, FAISS, Vector Databases, RAG Pipelines, Prompt Engineering, Tool Use / Function Calling, Agent Memory, Multi-Agent Orchestration

LLM & AI APIs: Claude API (Anthropic), Groq AI, OpenAI API, LLM Integration, Streaming, System Prompts, Chain-of-Thought, Structured Outputs (JSON mode)

AI / ML: Machine Learning, Deep Learning, NLP, Intent Classification, Entity Extraction, TensorFlow, Scikit-Learn, Computer Vision, Model Deployment

Backend & APIs: FastAPI, Django, Node.js, REST API Design, Microservices, Horizontal Scaling, Load Balancing, Caching, Rate Limiting

Frontend: React.js, Vue.js, Vite, HTML5, CSS3, Responsive Web Design, Component-Driven Architecture

Languages: Python, JavaScript (ES6+), Java, C, C++, SQL

Databases & Search: MySQL, SQLite, Redis, FAISS — schema design, query optimization, vector indexing, relational modeling

CS Fundamentals: Operating Systems (processes, threads, deadlocks) · DBMS (indexing, transactions, normalization) · Computer Networks (TCP/IP, HTTP/HTTPS, DNS)

DSA: 300+ problems (LeetCode + GFG) — Arrays, Trees, Graphs, DP, Segment Trees, Sorting & Searching, Bit Manipulation

Tools & DevOps: n8n, Git, GitHub, Postman, VS Code, Docker, Render, GitHub Actions (CI/CD), Agile, SDLC

CERTIFICATIONS

- Claude Code in Action · Anthropic
- Claude 101 · Anthropic
- Apply AI: Analyze Customer Reviews · Cisco Networking Academy
- Introduction to Modern AI · Cisco Networking Academy
- Full Stack Dev Internship · Internshala
- IDE Bootcamp – Edition 3, Phase 2 · AICTE & Wadhwani Foundation
- Introduction to Data Science & Python Essentials 1 & 2 · Cisco Networking Academy
- Samadhan 2.0 & 1.0 — Hackathon Finalist · SISTec Bhopal
- [View All Certificates](#)

ACHIEVEMENTS & LEADERSHIP

- Competitive Programming Co-Lead — GDG SISTec Bhopal: organized **10+ coding contests** and workshops; mentored **50+ students** in DSA, AI/ML, and full-stack development; increased chapter participation by **40%**.
- Super 50 — Institute Top 50: selected among the top **50 students institute-wide** across all branches for outstanding academic and technical excellence.
- Solved **300+ DSA problems** on LeetCode and GFG (medium/hard focus — DP, Graphs, Binary Search, Trees, Bit Manipulation); completed GFG 160-Day Coding Challenge.
- Consistent academic record: Class 10: **97%** | Class 12: **87%** | B.Tech CGPA: **7.6**.
